Western Systems TS2 Type 2 Controller Cabinets (Type P series)

Western Systems is now building TS2 Type 2 controller cabinets. Designed to specific agencies requirements, these cabinets offer improvements over traditional TS1 cabinets, while keeping ease of use functions intact, like complete fold down load-bays and flash program reassignment.

Standard features:

- 16 position load-bay panel with complete roll-down capability
- Wired for traditional TS1 connectors and serial data communications through Bus Interface Units
- Up to 64 channels of detection in 4 detector rack when utilizing SIEMENS M50 series controllers
- Designed for use with Malfunction Management Units

Optional features:

- Communications panels
- Video surge suppression panels
- Can be designed to meet agency specific requirements
