TRAFFIC JACKETS

Western Systems is the proud distributor of a new and exciting product in the Northwest traffic supply market.

The *Traffic Jacket* is a durable coated nylon bag that slips easily over your newly installed signal head, attaching securely with two snap buckles. Your new intersection will look professional and clean until the day it is fully operational.

The *Traffic Jacket's* clever design makes the installation of the bag simple and efficient. No longer will you have to fuss with dirty and torn burlap bags, which are either too small, too big, or just plain ugly.

The *Traffic Jacket* has a front mesh panel so that you can test your signals while the bag is installed on your new signal head.

Why spend all that time and money on a new intersection only to have it look shabby until it is fully operational? Best yet, it can be used over and over again.

The *Traffic Jacket* carries an 18 month warranty!
