P-PLUS

Custom Traffic Signal Cabinets to Fit your Community's Needs

Our **U.S.-manufactured traffic cabinets**, custom-built in **Everett, WA**, ensure full **BABA compliance** while delivering the **durability, reliability, and innovation** agencies need. Designed to meet project-specific requirements, they seamlessly integrate into existing infrastructure—keeping communities connected and future-ready.

Battery Backup Made Simple

Western Systems builds custom traffic signal cabinets to help you meet the needs of your community's roadways and intersections. Our unique and patent-pending designs enable you to save space and increase power while creating modern, safe, and efficient intersections. With our P-Plus cabinet, battery backup comes integrated – requiring no additional space or new foundations to help keep your intersections running during a power outage.

This picture of the cabinet represents only one type of the P-Plus model available.

MoreSpace.MorePower.BetterFunctionality

Condensed Design to Fit Existing Infrastructure

- Create a smaller footprint while accommodating existing infrastructure
- Extra side shelve functionality for detector rack, CCU or ITS equipment
- No additional space is needed to add battery back up

Save Valuable Space with our Dual Load Switch

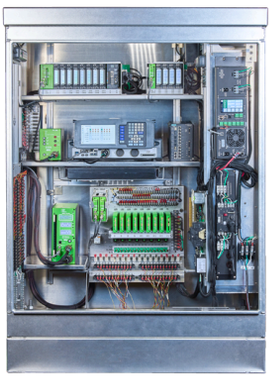

- Our dual load switch incorporates two switches in one
- Accommodates up to an 8-position load bay
- Provides up to 16 channels of detection

Unique Backup Power Solutions

- Built-in battery backup compartment within the enclosure
- Isolated battery compartment with side door access
- Easily plug in a generator without having to open the cabinet door

Superior Design and Manufacturing

- Available in NEMA TS1 and TS2
- Cabinet sizes include M36, P, Stretched-P and R
- Proudly made in America
